### **Short Abstract**

Don't we all learn more when we're having fun? We believe that AAC users and communication partners learn best when things are meaningful and motivating. In this lively workshop, you'll learn by doing, so get ready to join in the fun! Bring along your AAC and get ready to play. Whether you're new to Augmentative and Alternative Communication (AAC) or have years of experience, there's something for everyone.

This workshop is about making learning enjoyable and impactful. Engage in practical activities designed to build your communication partner skills. The best part? These activities can be taken back to your schools, homes, or clinics to use in many different ways. Perhaps you run a session in a staff meeting - these activities will be perfect for teachers to get hands on practice. Perhaps you need some new inspiration for your therapy sessions. Maybe you are running some group programs with AAC users. These AAC activities are designed to engage ALL learners!

Expect to be inspired by creative approaches, innovative ideas, and valuable resources that can help teams support their AAC users. We believe in the power of community, so this is also a fantastic opportunity to connect with other participants, share experiences, and learn from each other.

Bring your AAC devices, enthusiasm, and a sense of adventure! Join us for an exciting, hands-on session where learning and fun go hand in hand. Let's make communication a joyful experience for everyone involved.

### **Long Abstract**

This presentation/workshop is part of the AssistiveWare stream.
